## CAT STORIES

*A feel-good documentary*

Directed by Carmen Cobos

Produced by Kees Rijninks

'*Cat Stories*' is the filmmaker's search for the emotional motives of millions of Dutch families to keep a cat as a domesticated animal. By means of a kaleidoscopic collection of portraits, which all center on the relationship between cats and their owners, the Spanish born director tries in a light-hearted, humorous manner to find out why we attribute human feelings to our cats, why we often care more for them than for our own family and what that ultimately says about us.

written & directed by Carmen Cobos | written & produced by Kees Rijninks
